

BLOW-IN MOBILES AND PLATFORMS

MOBILE WORKPLACES FOR PROFESSIONALS

X-Floc Insulation blow-in platform

Everything needed at hand. Anytime. Anywhere.

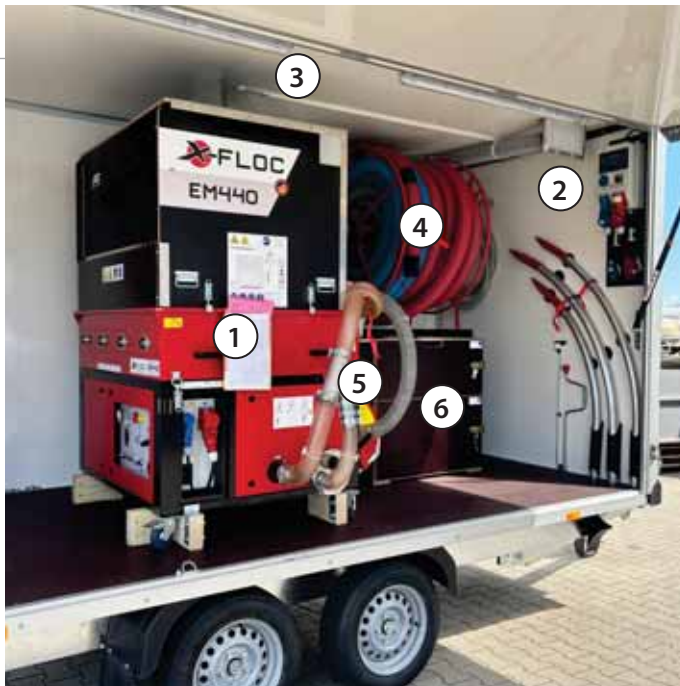

- ▶ **Reduce set-up times: Start quickly – finish early**
- ▶ **Compact design:**
Everything needed to start blowing right away is mounted on a solid 1350x2800x1890mm platform.
- ▶ **Weight optimized layout:**
Including forklift shoes for easy lifting and moving
- ▶ **Fully equipped like a professional blow-in mobile, including:**
 - ▶ Insulation blow-in machine (EM3xx or EM4xx)
 - ▶ Hose reel for efficient storage
 - ▶ Suction barrel for cleaning
 - ▶ Storage system, hoses, accessories and more
- ▶ **Available in three configurations:**
 - ▶ Pure platform (upgradable with tarpaulin structure)
 - ▶ Soft cover version with tarpaulin structure
 - ▶ Hard cover version with permanently installed box body (container)

For use in prefabrication

- ▶ Fibreblow® Essential Feeder Lift arranged on the platform in combination with an EM4xx blow-in machine
- ▶ Work platform can be moved as a complete unit without set-up times to any location where blowing is to take place
- ▶ Adaptable to any insulation requirement: manually, with a lance for large elements or fully automated in combination with a Fibreblow® Essential Plate

Exemplary standard equipment

- 1 Insulation blow-in machine with transport lock
- 2 Electrical installation
3x230V
2x400V-16A all-current sensitive
- 3 Interior lighting with two 18W LED suitable for damp locations
- 4 Hose reel for blowing and conveyor hoses up to 110m
- 5 Suction device incl. material diverter and suction barrel for quick switching between blowing and suction mode
- 6 Built-in storage system with two drawers

Further components

Steel **drawbar lock** for increased theft protection

Tow-stage **aluminium stairs**, working height 400mm

Power generator for reliability on the construction site, can also be integrated into the **blow-in platform**

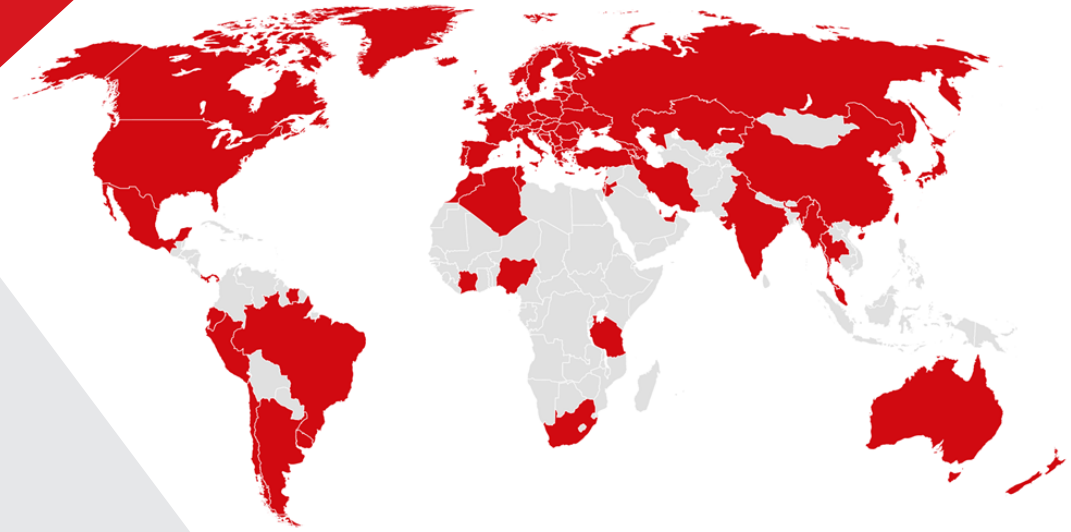

X-Floc Insulation blow-in mobiles

Ready for action wherever you need your equipment.

- ▶ **Reduce set-up times: Start quickly – finish early**
- ▶ **Smart design with ideal alignment of equipment:**
Everything needed to start blowing right away is mounted in a compact mobile trailer for blow-in professionals
- ▶ **Suitable for long and short distance travel:**
Drive to your construction site at speeds of up to 100km/h
- ▶ **Sophisticated concept with everything you need:**
 - ▶ EM300 or EM400 series insulation blow-in machine
 - ▶ Complete electrical installation with illumination
 - ▶ Hose reel for efficient storage and suction barrel for cleaning
 - ▶ Storage system, hoses, accessories and more
- ▶ **Highly customisable:**
 - ▶ Tarpaulin structure or hard cover with box body
 - ▶ Available with your company's design and advertising
 - ▶ Different trailer lengths available to increase loading space for material
